SPLIT & WINDOW TYPE  
AIR CONDITIONERS

**THE INTELLIGENT CHOICE IN COMFORT**

**FUJITSU GENERAL LIMITED**

# Energy saving & Ecology

Deepening environmental, resources and global warming problems. As a global enterprise, Fujitsu General group recognizes that contributing to development of a sustainable economic society is today's most important management topic, and is engaged in a series of environmental protection activities reaching up to sales, maintenance, and recycling, and is aggressively making its products more energy saving.

# CLASS A CLASS A

## Energy-Efficiency Classifications

According to a new EC Directive, the indication of the Energy Efficiency classification on household air conditioners became compulsory. This aims to provide consumers with clear and objective information regarding energy-saving, and to encourage them to select products that are environmentally friendly. An Energy Label, like that shown in the sample below, will be provided in shop displays. In the label, the equipment is rated, with "A" being the most efficient. You may notice these labels and ratings appearing soon in shops that sell air conditioners. For easy understanding, the following information will be indicated for each model.

**Energy Label**

**The product**  
Air-conditioner  
FUJITSU  
AO-\*\*\*  
AS-\*\*\*

**The model number**

**The class**  
An energy efficiency class in seven steps, from A to G.

**Annual energy consumption**  
The annual energy consumption is calculated by multiplying the total power input by an average of 500 hours per year in cooling mode at full load.

**The Energy Efficiency Ratio**  
The higher the EER, the greater the energy efficiency.

**The type of air conditioner**

**The noise**

Outdoor  
Indoor

Further information is contained in product brochures

Norm EN 814  
#MicroBlimar  
Energy Label Directive 2002/91/EC

## Classifications

There are seven classifications of energy efficiency, from A to G. The most efficient level is "A" and the least efficient level is "G".

Energy efficiency class of the unit in COOLING mode	Energy efficiency class of the unit in HEATING mode
<b>A</b> 3.20 < EER	<b>A</b> 3.60 < COP
<b>B</b> 3.20 ≥ EER > 3.00	<b>B</b> 3.60 ≥ COP > 3.40
<b>C</b> 3.00 ≥ EER > 2.80	<b>C</b> 3.40 ≥ COP > 3.20
<b>D</b> 2.80 ≥ EER > 2.60	<b>D</b> 3.20 ≥ COP > 2.80
<b>E</b> 2.60 ≥ EER > 2.40	<b>E</b> 2.80 ≥ COP > 2.60
<b>F</b> 2.40 ≥ EER > 2.20	<b>F</b> 2.60 ≥ COP > 2.40
<b>G</b> 2.20 ≥ EER	<b>G</b> 2.40 ≥ COP

These classifications are for split and multi-split air conditioners.

# ALL DC ALL DC

## ALL DC saves energy throughout the year

**DC Fan Motor**

**Inverter Control Base**

**DC Fan Motor**

**DC Compressor**

By making all the motors DC, electricity loss is decreased and power consumption is substantially reduced. In addition, fan motor high speed rotation is possible, and heat exchange efficiency is increased and annual power consumption amount is saved by increasing the airflow.

### Automatic filter cleaner **WORLD FIRST**\*1

**Entire filter is cleaned automatically in approx. 2 minutes**

Since the filter is cleaned automatically, energy saving capability is displayed without regard to the load on the air conditioner.

**Energy saving CLASS A cleared with a margin to spare**

If the energy saving effect is maintained, filter cleaning once every 2 weeks is effective.

**2 exhaustive bacteria eliminating and deodorizing countermeasures keep the air in the room clean**

If the energy saving effect is maintained, filter cleaning once every 2 weeks is effective.

### Bacteria eliminating countermeasure

- a** Dirt and dust are bacteria-eliminated by photocatalytic filter\*  
\* Displays double the effect of a conventional optical medium and retains its property for a long time to suck in and remove approx. 99.99% of cigarette odors and bacteria, etc.
- b** Drives away bacteria and refreshes the air by UV (ultraviolet rays) illumination

### Our unique technology that achieved top energy efficiency in the industry

- c** Energy saving by automatic filter cleaning function\*1  
This function allows an energy saving of more than 25% a year and maintains a smooth airflow by preventing the filters from being clogged with dust.
- d** Computer-designed fan provides a larger airflow than conventional models  
New air trunk, which provides a smooth airflow, and axial gap fan motor increase the max. airflow by 10% over that of conventional models.

CAE analysis

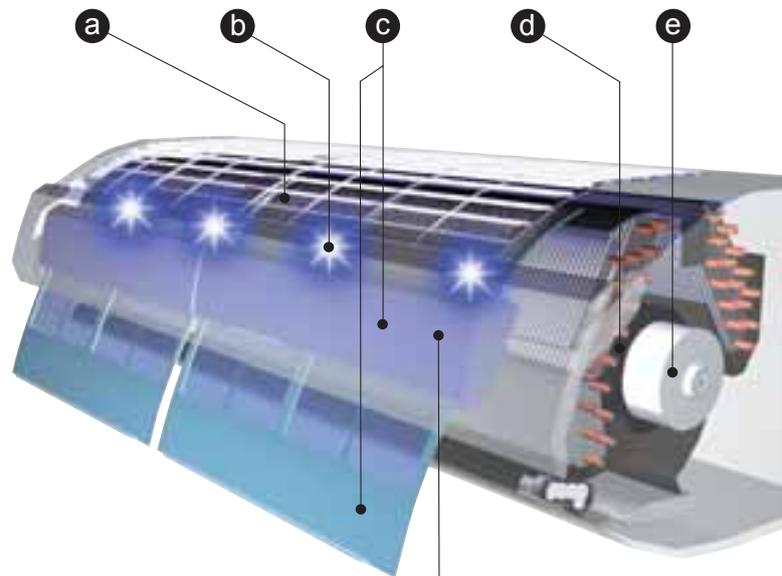

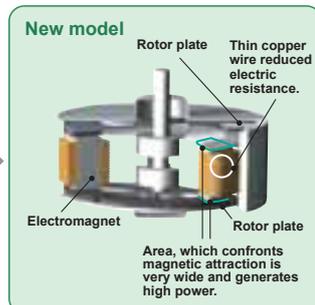

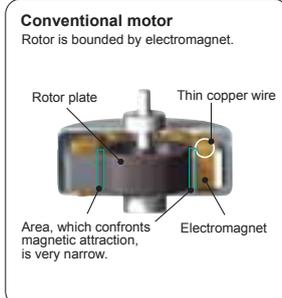

- e** Axial gap fan motor enables nonconventional high power and high efficiency\*2

#### Axial gap method

Rotor plates are installed above and below electromagnets.

#### Features (Compared to conventional models)

Compact size with 1.5 more power output Self-driven method increases rotating efficiency by 10%. Our electromagnetic field simulation technology enables low vibration and low noise.

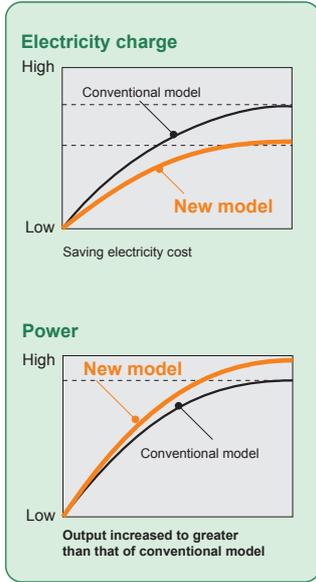

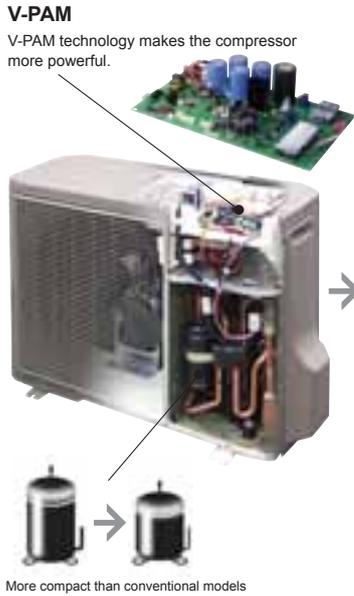

#### Antibacterial dust box

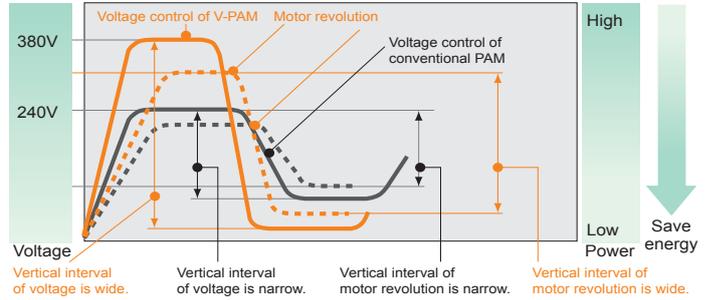

Removes dirt and dust by double brushes. Dust collection is approx. twice that in the past. (our company's comparison)  
Maintenance: Only throwing into a trash bin once every 2 years

\*1: Announced September 9, 2002. In room air conditioner for the home (Our company's investigation)  
\*2: Announced December 13, 2004. As fan motor for air conditioner (Our company's investigation)

## V-PAM inverter increases the max. output of the compressor significantly & enables high power & high efficiency

Comparison between V-PAM and conventional PAM

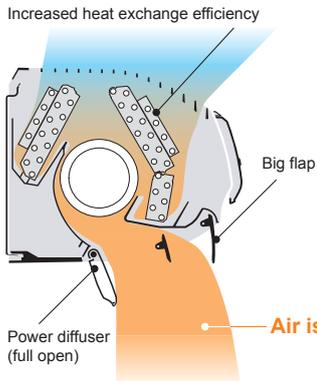

**Conventional PAM**  
Control range between energy saving and high power is small because vertical interval of voltage and motor revolution is narrow.

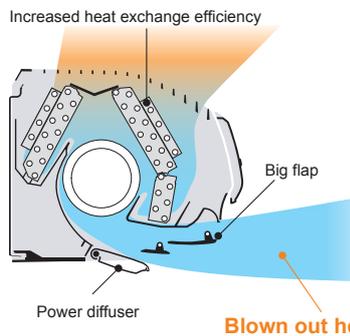

**V-PAM**  
V-PAM achieves high power by increasing the voltage up to 380V and making the motor rotate faster, and also saves energy in the stable state by making the motor rotate slower than that of conventional models by lowering the voltage.

## "Vertical airflow" provides powerful floor level heating

**No.1**  
Heating capacity

## "Horizontal airflow" does not blow cool air directly at the occupants in the room

CLASS A ALL DC  
ASYSB12LD

CLASS A ALL DC Heating  
ASYSB18LD

CLASS A ALL DC  
ASYSB24LD

## Original plasma air cleaning unit effectively cleans the air in the room

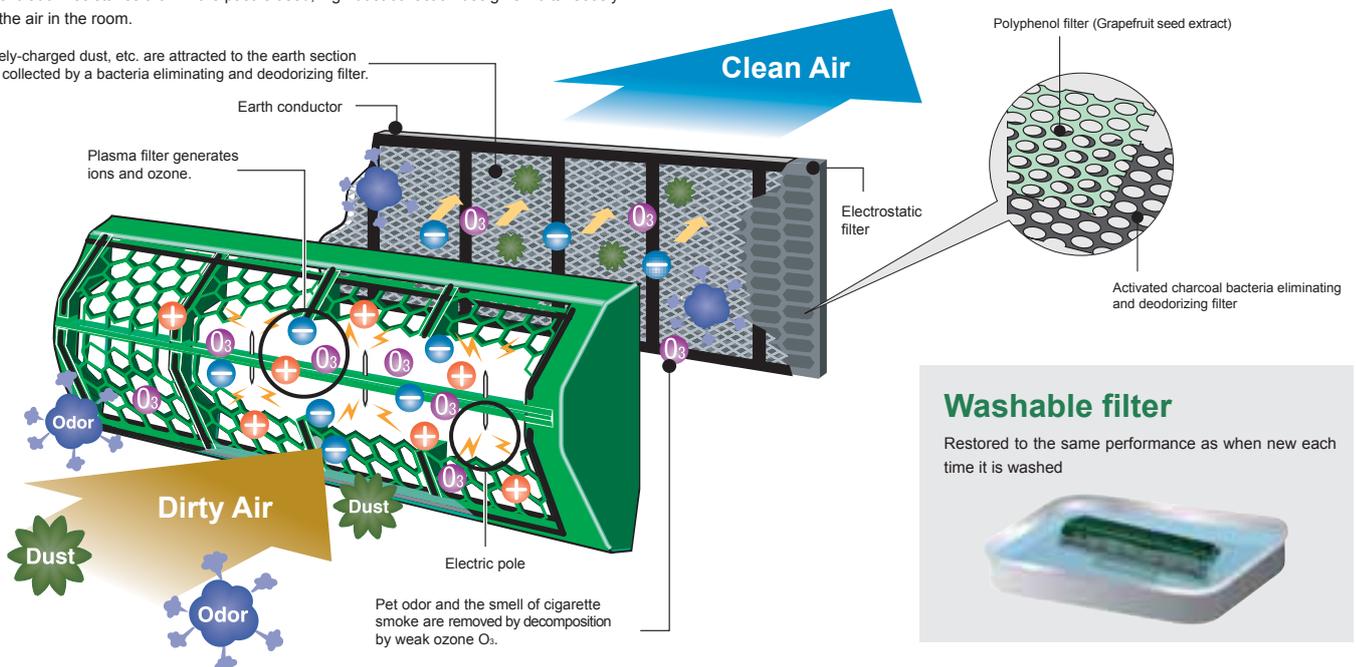

Plasma air filter mechanism

### Plasma unit

Mounts a plasma air cleaning unit. Minute dust particles are collected by an electrostatic filter and odor is suppressed by decomposition of foul odors by very weak ions. Since a filter with a lower ventilation resistance than in the past is used, high dust collection design simultaneously cleans the air in the room.

Negatively-charged dust, etc. are attracted to the earth section and are collected by a bacteria eliminating and deodorizing filter.

### Washable filter

Restored to the same performance as when new each time it is washed

## Plasma air cleaner quickly removes small dust particles & odors

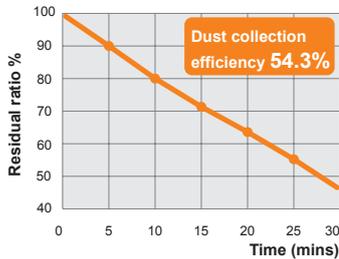

### Collects dirt such as...

House dust / Pet fur and dander / Cigarette smoke / Mite carcass / Mold spore / Pollen

### Absorbs odors such as...

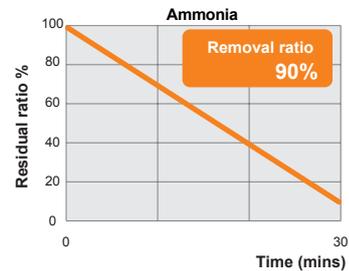

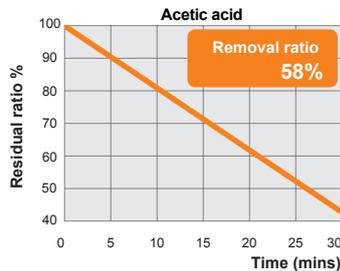

Smell of cigarette smoke / Pet odor / Kitchen garbage smell / Perspiration and body odor

### Dust collection performance (ASYB09/12/18LD)

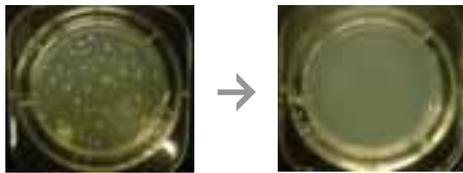

Test method: JEM 1417  
Test room: 30m<sup>3</sup>, sealed room  
Measurement conditions: Cigarette smoke (5 cigarettes burned simultaneously)

### Deodorizing performance (ASYB09/12/18LD)

Test method: JEM1467  
Test room: 1m<sup>3</sup>, acrylic sealed box  
Measurement method: Cigarette smoke (5 cigarettes burned simultaneously)

### Bacteria elimination effect by Polyphenol ceraglaze

The undiluted solution of the specimen was made the specimen fluid and suspensoid 0.1ml (approx. 107CFU/ml) of the test bacteria was inoculated.

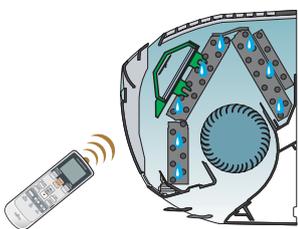

Tested by KITAZATO environment science center  
Test NO. :15-0253 Test condition: at 20 degrees C/24 hour action

## Inner drying operation & plasma effect

This model is equipped with an inner drying function. After the power is turned off, the dry operation starts inside the air conditioner. The plasma air cleaning unit eliminates bacteria, deodorizes, and keeps the interior of the air conditioner clean by generating ozone and ions.

### Covered with beading

Bacteria grows in beading, and it causes bad odor.

After operation ends, start approx. 30 minutes speed cleaning operation by merely pressing the COIL DRY button.

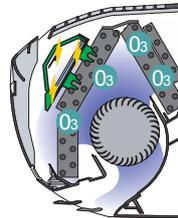

### Removes moisture

Drying operation for approx. 15 mins

### Bacteria elimination

Ozone bacteria eliminating operation for approx. 15 mins

"Inner drying operation" and "ozone bacteria eliminating operation" keep the inside of the air conditioner clean at all times. That's why air from the air conditioner is always clean and high efficiency is realized.

## Easy maintenance

### Easy maintenance and always clean. Troublesome maintenance has been made easy.

Since the front panel is easy to remove, maintenance is also easy.

### Open panel

ASYB09/12/18LD

## Low ambient

High efficiency compressor and newly added sensor for monitoring the refrigerant temperature makes possible fine-tuned inverter control which, in turns, make it possible to correspond to lower outdoor temperatures.

### Compact Sized Indoor Unit

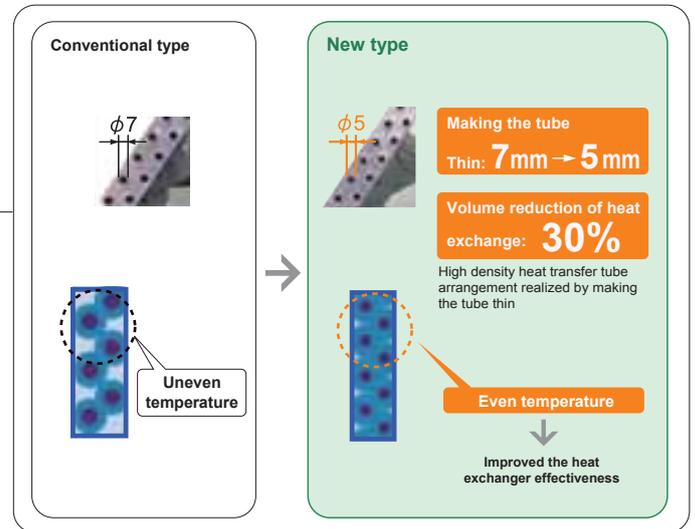

Top class compact size achieved by realizing the highest efficiency in the industry

Simple and compact design matches any interior decor

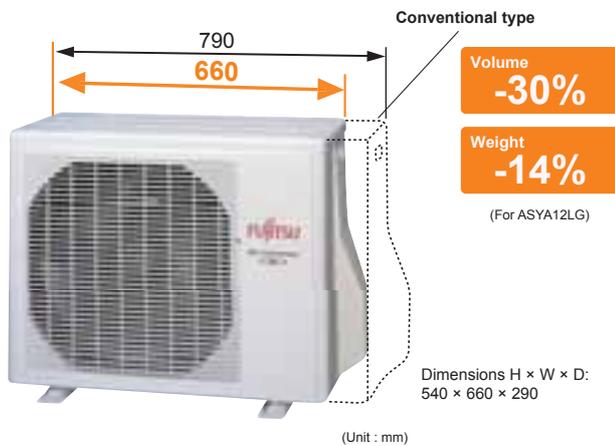

### High density heat transfer tube arrangement realized by making the tube thin

### Compact Sized Outdoor Unit

Top class compact size increases workability and installation flexibility

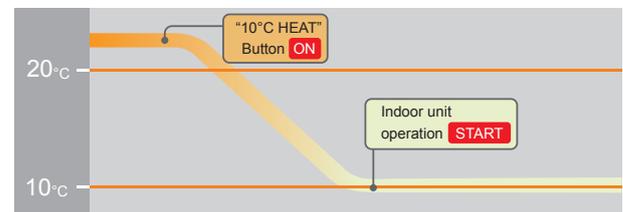

Compact design allows a wider selection of outdoor unit installation sites

### 10°C HEAT Operation

The room temperature can be set to go no lower than 10°C, thus ensuring that the room does not get too cold when not occupied

Caution)

- When the room temperature is higher than 10°C, "10°C HEAT" operation does not start. Operation starts and maintains the room temperature at 10°C for 48 hours when the temperature drops below 10°C.
- When "10°C HEAT" operation stops, the room set temperature quickly returns to the preset temperature.

## Air conditioner filter features

**Long-life\*  
Ion Deodorization Filter**

The filter deodorizes by powerfully decomposing absorbed odors using the oxidizing and reducing effects of ions generated by the ultra-fine-particle ceramic.

(\*The filter can be used for approx. 3 years if it is washed under water to restore its surface action when it is dirty.)

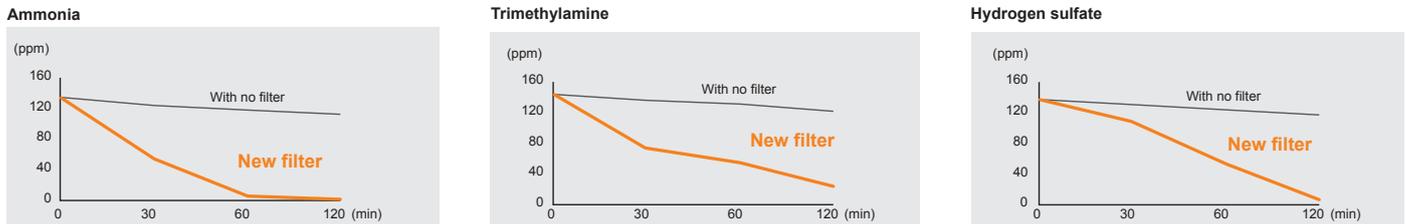

+ Using different filters at both sides

**Apple-catechin Filter**

Fine dust, invisible mold spores, and harmful microorganisms are absorbed onto the filter by static electricity, and further growth is inhibited and deactivated by the polyphenol extracted from apples.

### Deodorizing effect (Odor reduction rate)

Testing organization : Environmental Sanitary Inspection Center Test method : Deodorization Test

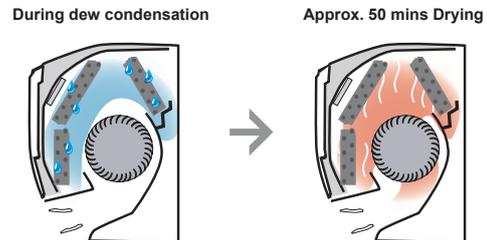

## Easy maintenance

**Easy maintenance and always clean.**  
Troublesome maintenance has been made easy.

Since the front panel is easy to remove, maintenance is also easy.

## Inner drying operation

This model is equipped with an inner drying function. After the power is turned off, the dry operation starts inside the air conditioner. This prevents the growth of mold and bacteria inside the air conditioner.

## Quiet operation

AGYF14LA

### Flexible & easy installation

Beneath standard window

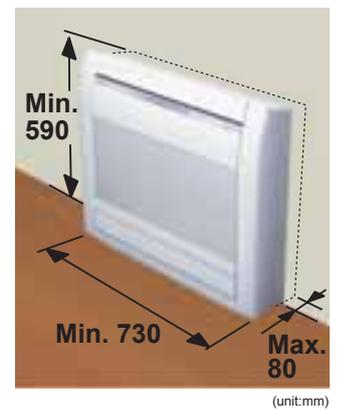

Standard concave portion

Wall

Half concealed (Optional parts necessary)

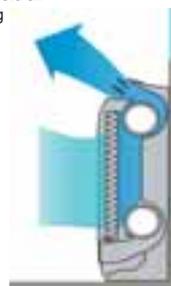

### 2-Fan & Wide airflow

#### Cooling

Prevents cold air from falling

#### Heating

Prevents cold draft from window

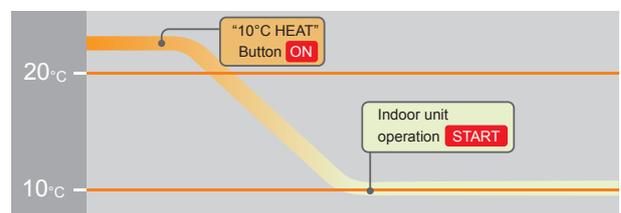

### 10°C HEAT Operation

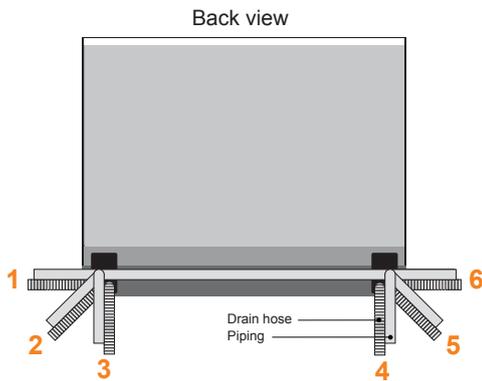

The room temperature can be set to go no lower than 10°C, thus ensuring that the room does not get too cold when not occupied

Caution)

- When the room temperature is higher than 10°C, "10°C HEAT" operation does not start. Operation starts and maintains the room temperature at 10°C for 48 hours when the temperature drops below 10°C.
- When "10°C HEAT" operation stops, the room set temperature quickly returns to the preset temperature.

## Choice of 6-direction drain & piping connection

## Air conditioner filter features

### Long-life\* Ion Deodorization Filter

The filter deodorizes by powerfully decomposing absorbed odors using the oxidizing and reducing effects of ions generated by the ultra-fine-particle ceramic.

(\*The filter can be used for approx. 3 years if it is washed under water to restore its surface action when it is dirty.)

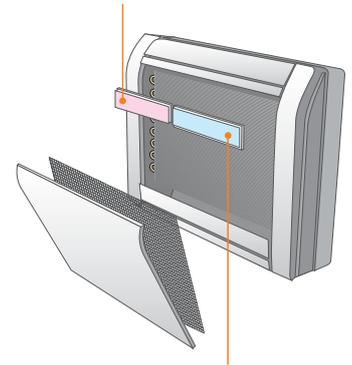

+ Using different filters at both sides

### Apple-catechin Filter

Fine dust, invisible mold spores, and harmful microorganisms are absorbed onto the filter by static electricity, and further growth is inhibited and deactivated by the polyphenol extracted from apples.

### Apple-catechin Filter

### Ion Deodorization Filter

## Quiet operation

Industry leading noise levels

Fan speed	Noise level
Quiet	22dB(A)

## Built-in timers

### Weekly timer

Possible to set ON/OFF time to operate twice each day of the week

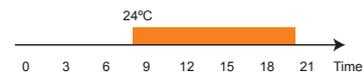

Easy-to-understand time bar display

Setup screen example  
(Set to Wednesday: 8:00 to 20:00)

Screen after setup

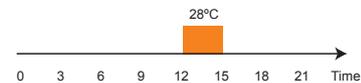

### Setback timer

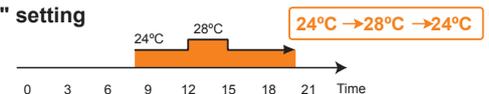

Possible to set temperature for two time spans and for each day of the week

Setup screen example  
(Set from Sunday to Saturday: 12:00 to 15:00, 28°C)

### At "Weekly timer" + "Set back timer" setting

## Low ambient

High efficiency compressor and newly added sensor for monitoring the refrigerant temperature makes possible fine-tuned inverter control which, in turns, make it possible to correspond to lower outdoor temperatures.

Cooling	Heating
-10 to 43°C	-15 to 24°C

## Washable panel

Since the panel is removed and washed easily, it is always clean.

Removable panel

## Optional parts

Wired Remote Controller: UTB-YUD

Half Concealed Kit: UTR-STA

## Energy Saving

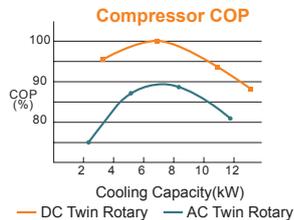

High Efficiency DC Inverter Multi system permits energy saving operation and 40% higher efficiency than a Constant-Speed Multi system. Improved Inverter cooling ratio prevents decrease in capacity under overload operation.

Energy Saving Over a Year's Time

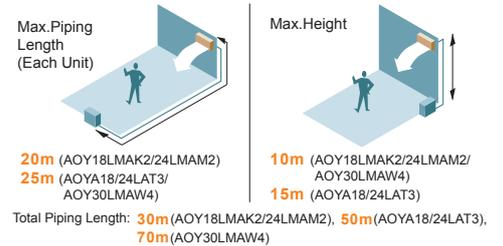

## DC Twin Rotary Compressor

Efficiency is improved over a wide range from high-speed rotation at high load up to the low-speed rotation region at low-load where long-term use is especially frequent, and high power is produced with little power consumption. Also, twin rotor provides low-vibration and quiet operation.

## Flexible Installation

The outdoor unit can be installed in a wide range of properties by the long piping of 30m (gas chargeless) for AOY18LMMAK2/24LMMAK2, 50m (gas chargeless up to 30m) for AOYA18/24LAT3 and 70m (gas chargeless up to 50m) for AOY30LMAW4.

2 Rooms (18type) 1 O.U. to 2 I.U. Total capacity of indoor units 4.1-7.0kW can be connected 8 varieties of connections in 2 I.U.

3 Rooms (18type) 1 O.U. to 2-3 I.U. Total capacity of indoor units 4.1-8.8kW can be connected 9 varieties of connections in 2 I.U. / 9 varieties of connections in 3 I.U.

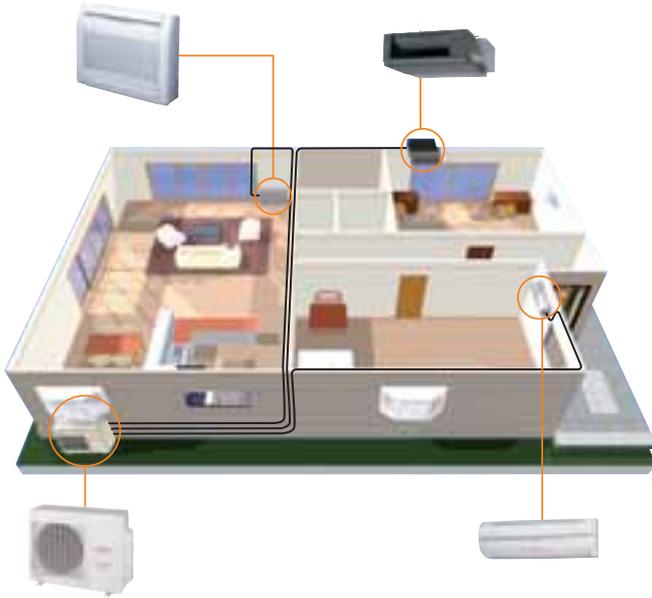

2 Rooms (24type) 1 O.U. to 2 I.U. Total capacity of indoor units 4.1-8.8kW can be connected 13 varieties of connections in 2 I.U.

3 Rooms (24type) 1 O.U. to 2-3 I.U. Total capacity of indoor units 4.1-10.6kW can be connected 12 varieties of connections in 2 I.U. / 18 varieties of connections in 3 I.U.

4 Rooms (30type) 1 O.U. to 3-4 I.U. Total capacity of indoor units 7.9-14.4kW can be connected 47 varieties of connections in 3 I.U. / 44 varieties of connections in 4 I.U.

CLASS A ALL DC  
AU YA24LB

### 2-stage turbo fan **WORLD FIRST** \*1

High efficiency design by 2 stage structure

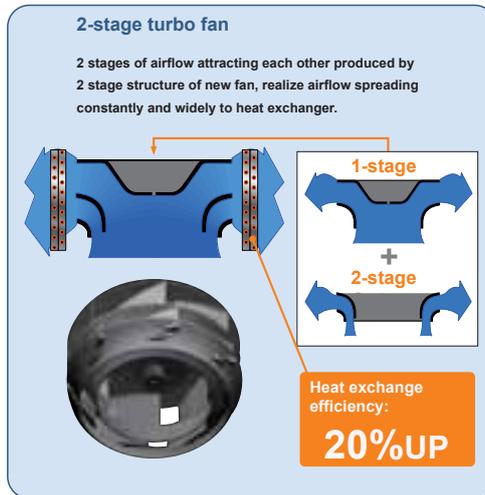

#### Conventional turbo fan

In case of conventional fan, airflow move to motor side which made air outlet range narrow, and velocity of air passing through heat exchanger was uneven.

#### 2-stage turbo fan

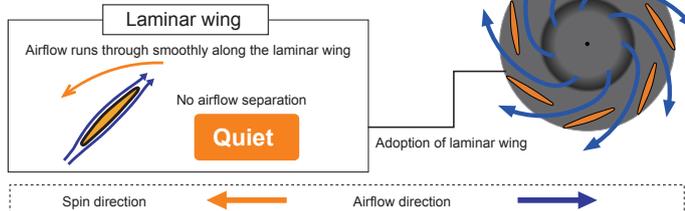

2 stages of airflow attracting each other produced by 2 stage structure of new fan, realize airflow spreading constantly and widely to heat exchanger.

### Quiet quality

Optimization of wing form (laminar wing type) and wing number (7 blades each)

Designed by CFD-analysis (fluid) simulations

### Quiet operation

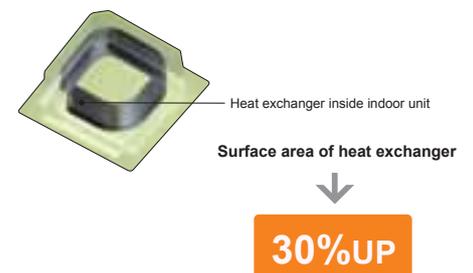

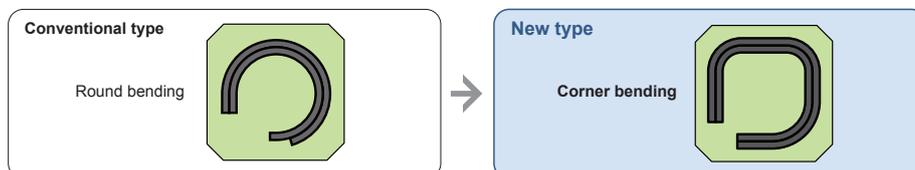

Top class cooling mode noise level in the industry attained

Fan speed	Noise level			
	12 type	14 type	18 type	24 type
High	37dB	38dB	38dB	49dB
Med	34dB	34dB	34dB	44dB
Low	30dB	30dB	30dB	36dB
Quiet	27dB	27dB	26dB	30dB

### High efficiency heat exchanger

Indoor unit heat exchanger (12/14/18 type)

Shape changed from round bending to corner bending

\*1: October 18, 2006, announcement at IKK2006. As fan for air conditioner (Our company's investigation)  
\*2: As of January 2006, size of outdoor unit minimized in 5.3kW and 7.0kW class European size (compact) ceiling cassette air conditioner. (Our company's investigation)

## Easy maintenance

### ① Maintenance of fan motor and fan

Maintenance of fan motor and fan can be done easily after taking off the panel, since bell-mouth can be removed easily

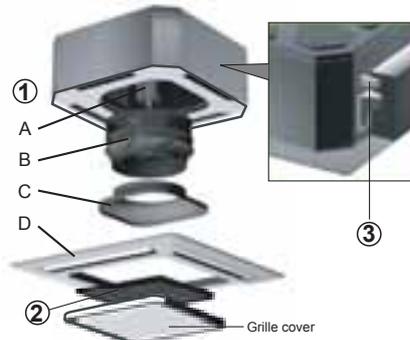

A : Fan motor    B : 2-stage turbo fan  
C : Bell-mouth    D : Panel

### ② Long life filter

: standard equipment

### ③ Adaptation of transparent drainage parts

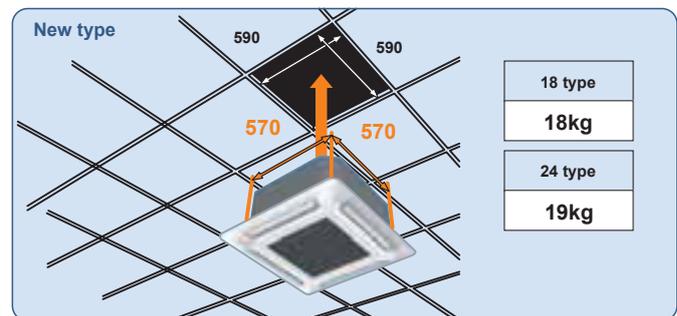

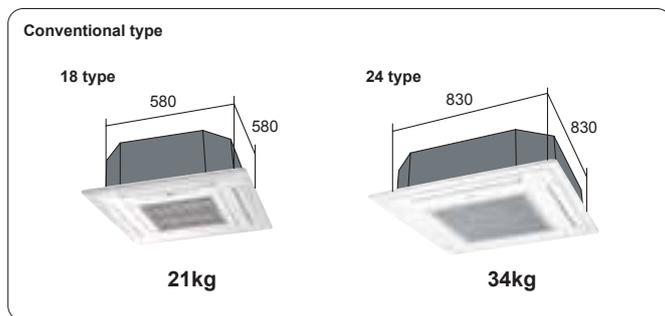

Easy check of operation of drain-up kit when you install

## Compact design

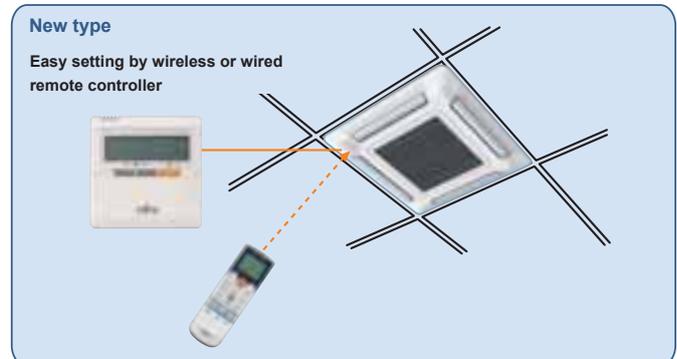

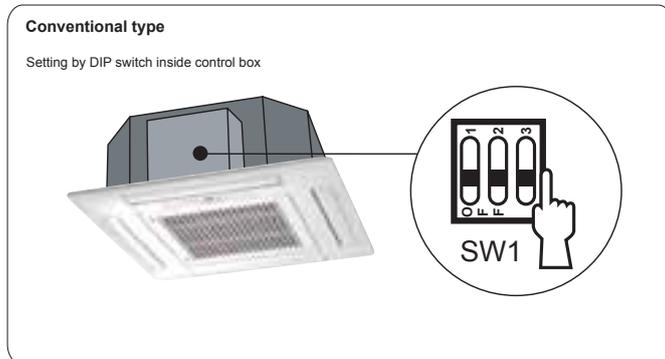

World first 24 type model in compact cassette category **WORLD FIRST** \*2

(Easy installation by taking off ceiling panel of 600 x 600 size)

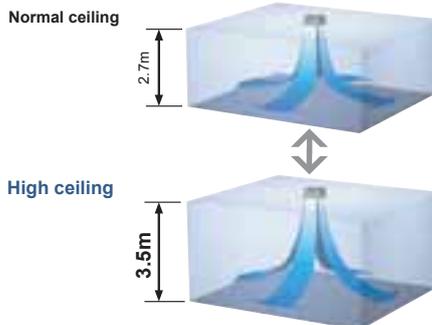

## Easy installation

Various work setting done from remote controller at the time of installation

## High ceiling mode

Air reaches sufficiently up to 3.5m height, even it is compact cassette type

# INVERTER

## CASSETTE TYPE

Powerful wide air flow & Quiet operation

Grille is an option

Light weight and Compact

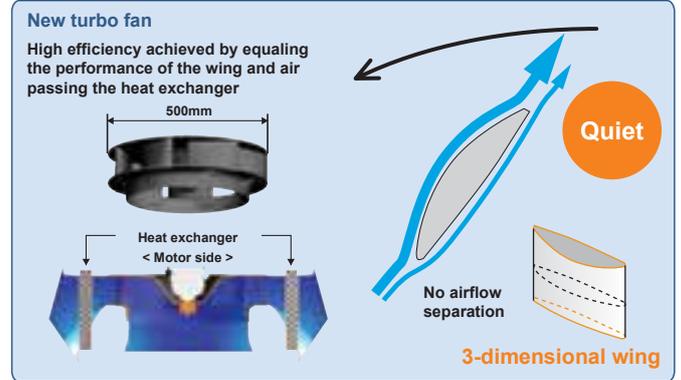

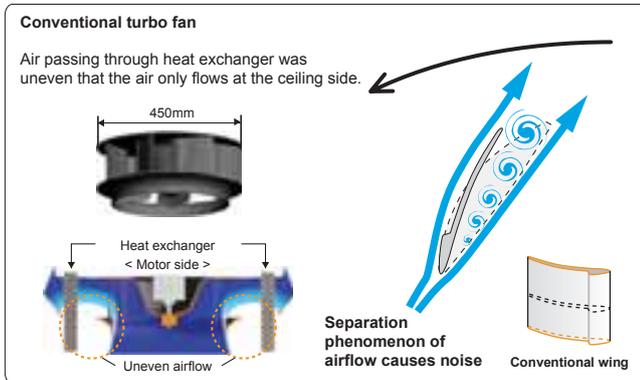

**CLASS A**  
ALL DC  
AUYA30LB

**CLASS A**  
ALL DC  
AUYA36LB

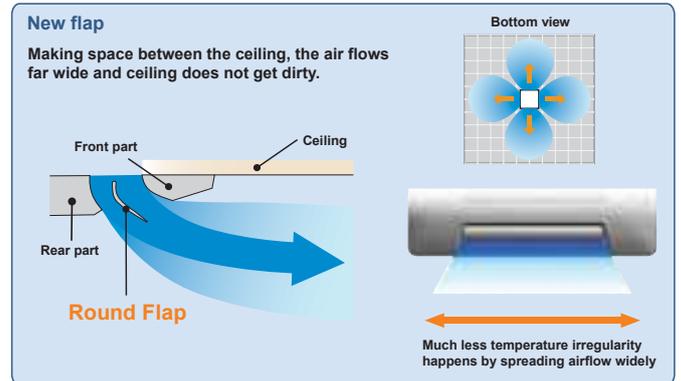

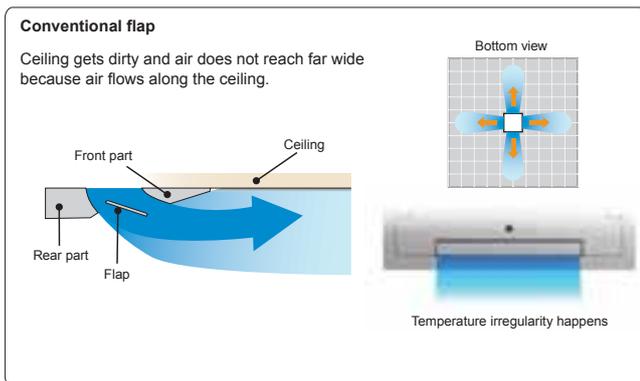

### Powerful wide flow & Quiet operation

High efficiency turbo fan with 3-dimensional wing

← : Spin direction → : Airflow direction ••••• : Turbulent flow noise

### Improvement of the flap

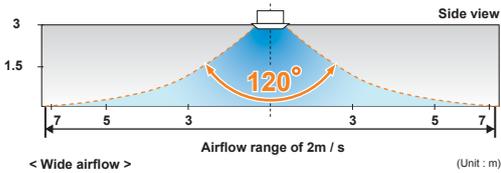

### Quiet operation

Fan speed	Noise level	
	30 type	36 type
High	40dB	43dB
Med	38dB	38dB
Low	36dB	36dB
Quiet	32dB	32dB

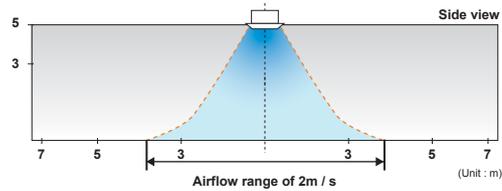

## Wide & powerful airflow

### Airflow range when the flap is upward

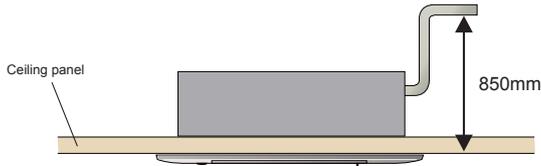

< Wide airflow >  
Powerful performance lets the airflow reach far wide

### Airflow range when the flap is downward

## High lift drain pump

## Adjustment of knot is possible after installation

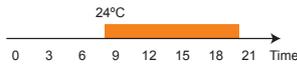

## Built-in timers

### Weekly timer

Possible to set ON/OFF time to operate twice each day of the week

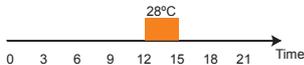

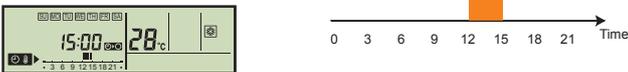

Setup screen example  
(Set to Wednesday: 8:00 to 20:00)

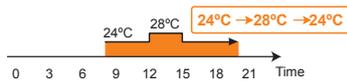

### Setback timer

Possible to set temperature for two time spans and for each day of the week

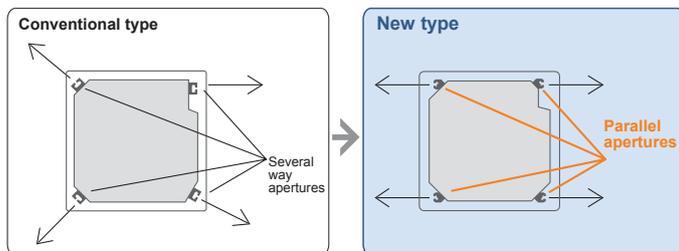

### At "Weekly timer" + "Set back timer" setting

## Filter sign

Announces timing of changing the filter

## One way aperture installation

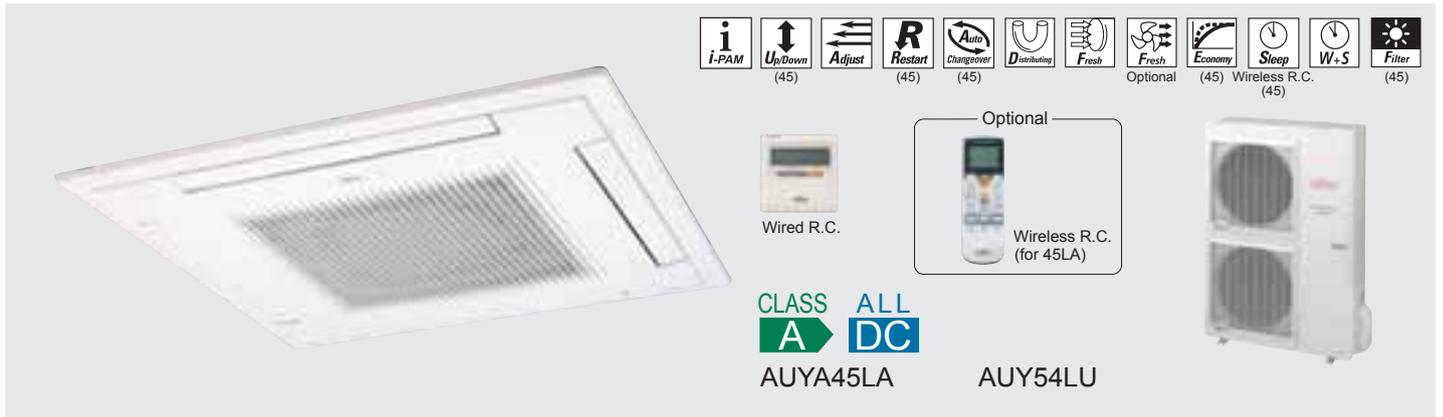

## Optional parts

- IR Receiver Kit: UTY-LRHYA1
- Wide Panel: UTG-AGYA-W
- Panel Spacer: UTG-BGYA-W
- Air Outlet Shutter Plate: UTR-YDZC
- Fresh Air Intake Kit: UTY-VXGA

# CASSETTE TYPE

## Comfortable airflow

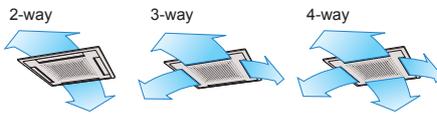

### 4 step swing

Auto air flow direction and auto swing

### 2-4 way air flow system

Select 2-way, 3-way or 4-way air flow to suit your needs.

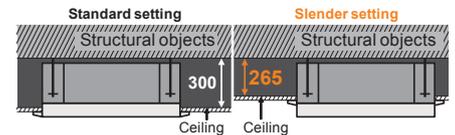

### Wide air flow

Larger air flap distributes the outlet air flow a longer distance in the horizontal direction.

## Flexible installation

Installation is done by "Standard setting" with more than 300mm of space. "Slender setting" lets it suitable for minimum 265mm installation space.

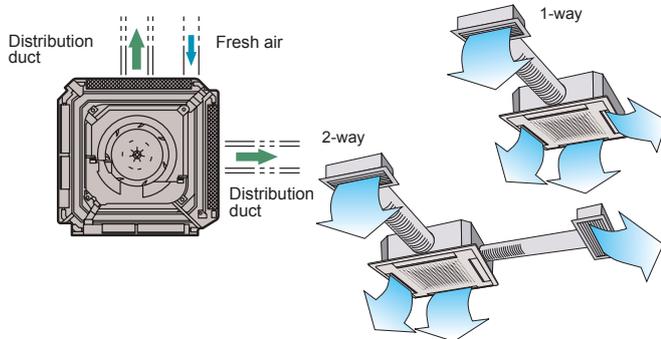

Installation Space (Built-in measurement)

## Duct connection hole opening

Fresh air can be introduced through this opening

Conditioned air can be distributed by means of a distribution duct

## Easy installation (For 45LA)

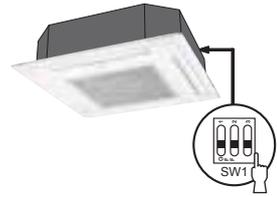

Main work settings can be done easily from the remote controller at installation

### Main work settings

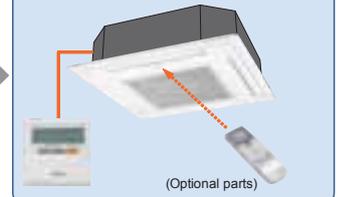

- High ceiling setting
- Auto restart
- Temperature adjustment when cooling / heating

### Conventional type

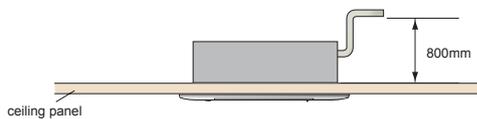

Setting by DIP switch inside control box

### Setting by wireless or wired remote controller

## Condensate pump lift to 800mm

## Optional parts

Wireless Remote Controller: UTB-YNA (For 45LA)

Additional Grille: UTG-AGEA-W

Simple Remote Controller: UTB-YPB (For 54LU)

## Flexible installation

### Example for floor installation

Floor console

### Example for ceiling installation

Under ceiling

## Low ambient

High efficiency compressor and newly added sensor for monitoring the refrigerant temperature makes possible fine-tuned inverter control which, in turns, make it possible to correspond to lower outdoor temperatures.

### 18 type

Conventional type

Cooling	Heating	Cooling	Heating
0 to 43°C	-10 to 24°C	-10 to 46°C	-15 to 24°C

### 24 type

Conventional type

Cooling	Heating	Cooling	Heating
0 to 43°C	-10 to 24°C	-10 to 46°C	-15 to 24°C

## Easy installation

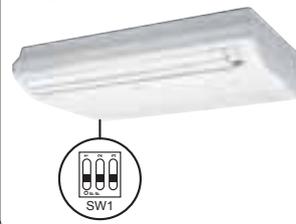

Main work settings can be done easily from the remote controller at installation

### Main work settings

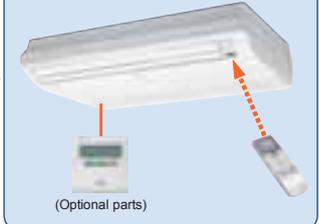

- High ceiling setting
- Auto restart
- Temperature adjustment when cooling / heating

### Conventional type

Setting by DIP switch inside control box

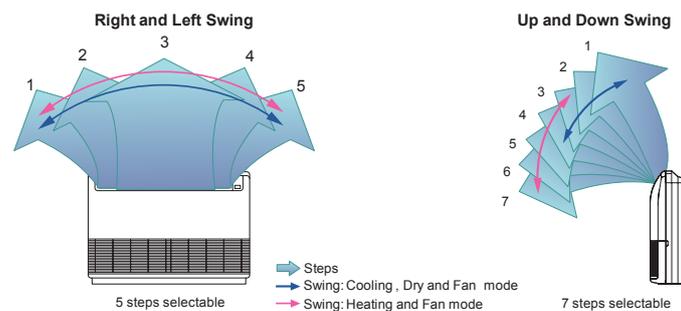

### Setting by wireless or wired remote controller

## Double auto swing

A combination of right/left and up/down directional swing allows 3-dimensional air direction control

## Optional parts

Wired Remote Controller: UTB-YUD

## Installation

## Multi auto swing, long distance airflow

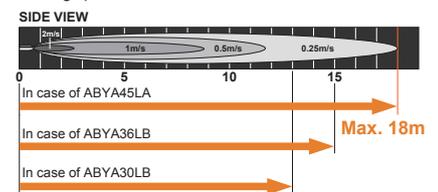

### Multi auto swing

A combination of right/left and up/down directional swing allows 3-dimensional air direction control.

### Long distance airflow

Due to air blasting performance of max. 18m, long-reach airflow is available for both cooling and heating operation.

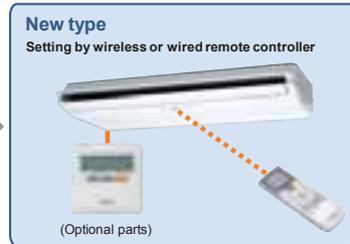

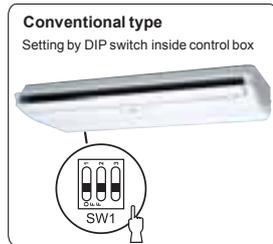

## Easy installation

Main work settings can be done easily from the remote controller at installation

### Main work settings

- High ceiling setting
- Auto restart
- Temperature adjustment when cooling / heating

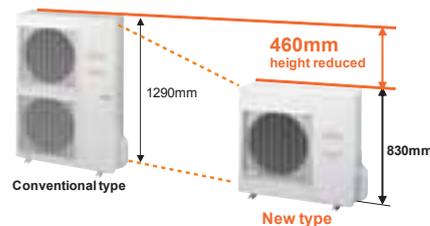

## Light weight & Compact

### Outdoor unit

Drastically downsized compared with the conventional model

### 36 type

Compact size

Conventional type	
Height	Weight
1,290 mm	98kg

New type	
Height	Weight
830 mm	62kg

Weight **-37%**

Volume **-36%**

## Slim & Compact design

## Condensate lift-up mechanism (Option)

Optional drain lift-up mechanism allows flexible installation.

**MAX. 500mm**

## Fresh air intake

## Long-life filter

High Efficiency long-life filter doubles the life of the filter compared to standard filters.

## Optional parts

Flange (Round): UTD-RF204

Wired Remote Controller: UTB-YUD

Drain Pump Unit: UTR-DPB24T

## Installation styles

### Embedded in Ceiling

### Hanging from Ceiling

## Easy installation

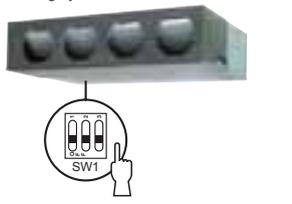

Main work settings can be done easily from the remote controller at installation

### Main work settings

- Static pressure mode setting
- Auto restart
- Temperature adjustment when cooling/heating

### Conventional type

Setting by DIP switch inside control box

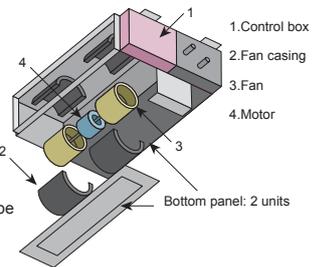

### Setting by wired remote controller

## Easy maintenance

In the case of rear suction type, as seen from lower rear part

Structural improvement is attained by making the bottom panel two pieces, front and rear, and the internal fan casing is also made dismantlable in two pieces, namely, upper and lower ones. The motor and fan maintenance and dismantling can be made easily by removing the rear panel and lower part of the casing with the main chassis installed.

## Built-in timers

### Weekly timer

Possible to set ON/OFF time to operate twice each day of the week

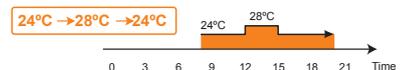

### Setback timer

Possible to set temperature for two time spans and for each day of the week

### At "Weekly timer" + "Set back timer" setting

## Optional parts

Flange (Round) : UTD-RF204

Flange (Square) : UTD-SF045T

Long Life Filter : UTD-LF25NA

Remote Sensor Unit : UTD-RS100

# INVERTER

## DUCT TYPE (High static pressure)

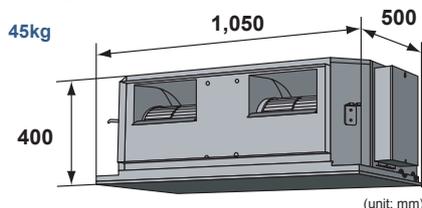

ARY45LH ARY54LU

### Design also corresponding to high static pressure

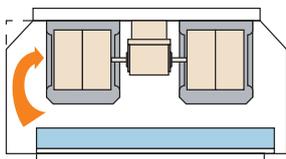

### Easy installation (Compact size & Lightweight)

By downsizing basic chassis and reducing materials weight, compact size and lightweight are realized

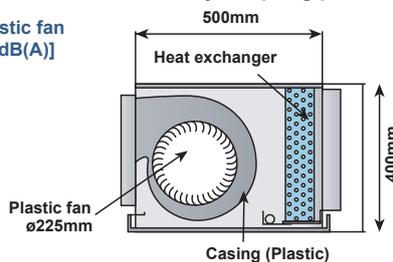

### Low noise

Turbulent air flow is reduced by cutting off the corners of conventional indoor unit front panel and fan case

Low noise is realized by adopting plastic case, plastic fan

Plastic fan [45dB(A)]

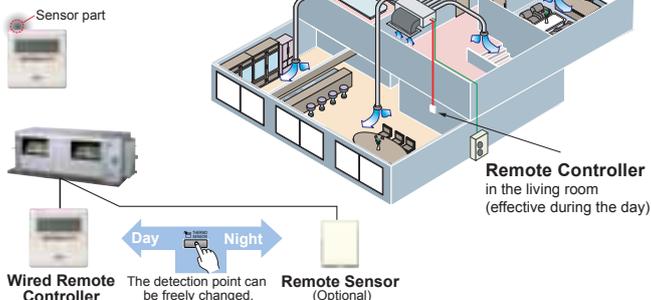

\* Model : Material (At 100Pa : Actual noise measurement value)

### Accurate & Comfortable

- New amenity space can be offered by installing a thermo sensor in the remote controller.
- Because the remote controller has a switching function, the user can select the sensor position. (Room temperature sensor selection)

Example of room temperature sensor selection

Under ceiling

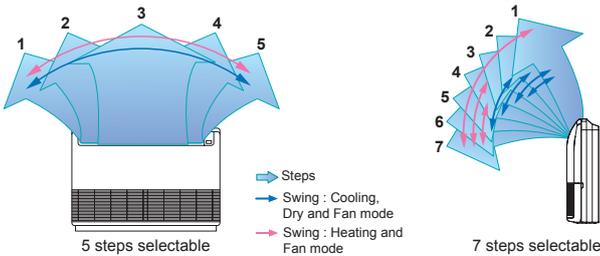

## Double auto swing

A combination of up/down and right/left directional swing allows three-dimensional air direction control

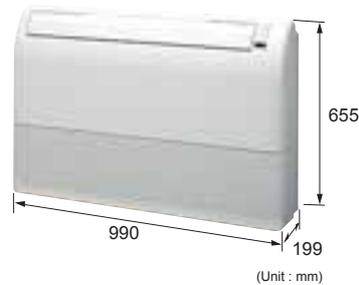

Right and Left Swing

Up and Down Swing

## Compact design

Symmetrical, slim and compact design

## Super vane

Double-flap "Super Vane" with newly developed special configuration boosts air flow sending cool air quickly to every corner of the room

## Auto-closing louvre

This function is common to all indoor unit types except the duct type

# DUCT TYPE

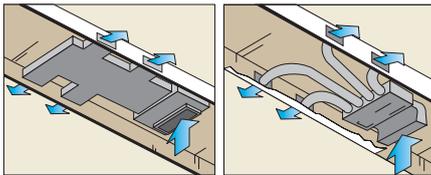

## Installation styles

### Embedded in Ceiling

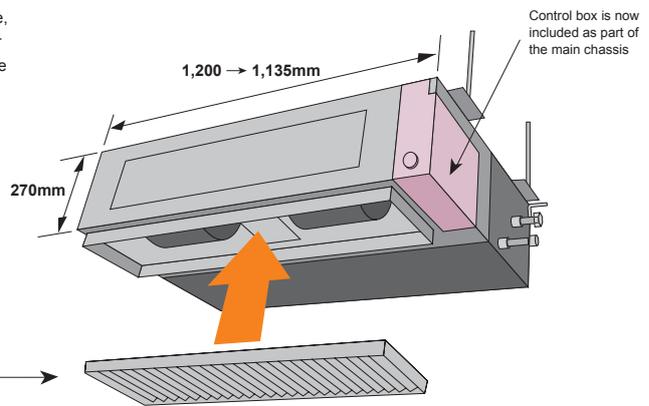

### Hanging from Ceiling

## Slim & Compact design

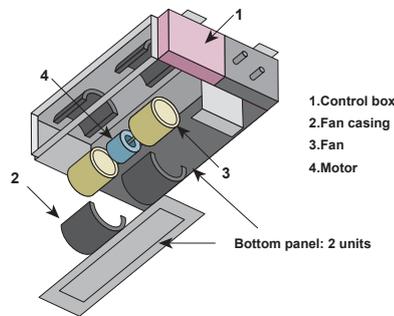

In the case of bottom suction type, not only does the design allow for installation in narrow ceiling space up to 270mm, further space requirements have been guaranteed by placing the control box inside the chassis.

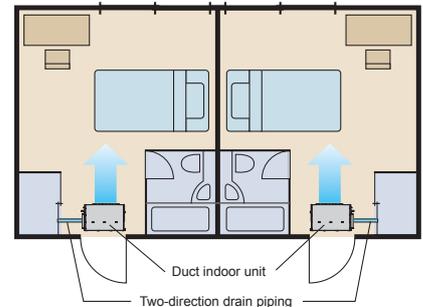

## Easy maintenance

### In the case of rear suction type, as seen from lower rear part

Structural improvement is attained by making the bottom panel two pieces, front and rear, and the internal fan casing is also made dismantlable in two pieces, namely, upper and lower ones. The motor and fan maintenance and dismantling can be made easily by removing the rear panel and lower part of the casing with the main chassis installed.

## 2-direction drain piping

## Optional parts

- Remote Sensor Unit: UTD-RS100
- External Control Set: UTD-ECS5A
- Simple Remote Controller: UTB-YPB
- Drain Pump Unit: UTZ-PX1NBA
- IR Receiver Unit: UTY-LRJY1

# DUCT TYPE (High static pressure)

## Design also corresponding to high static pressure

Model: ARY90TL

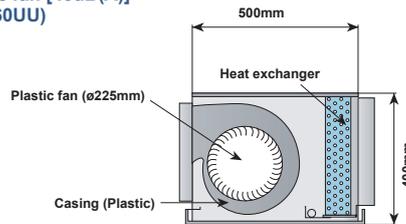

## Low noise

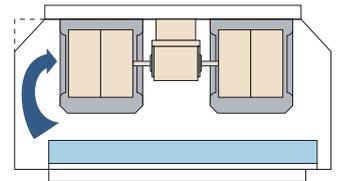

Turbulent air flow is reduced by cutting off the corners of conventional indoor unit front panel and fan case

Low noise is realized by adopting plastic case, plastic fan.

Plastic fan [45dB(A)] (ARY60UU)

(ARY60UU)

\* Model : Material (At 100Pa : Actual noise measurement value)

## Pursuance of amenity performance

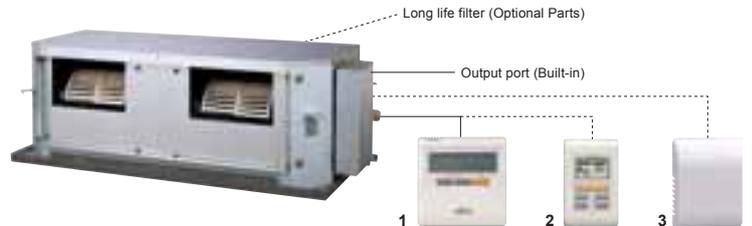

Various remote controllers and sensors can be selected

### 1.Wired Remote Controller with Thermo Sensor

- Room temperature sensor selection
- WEEKLY timer
- Temperature SET BACK timer
- Group control system
- Child lock
- Dual remote controllers <Optional parts>
- AUTO restart
- Energy saving
- Auto changeover <for heating>
- Hot start <for heating>

### 2.Simple Remote Controller (Optional Parts)

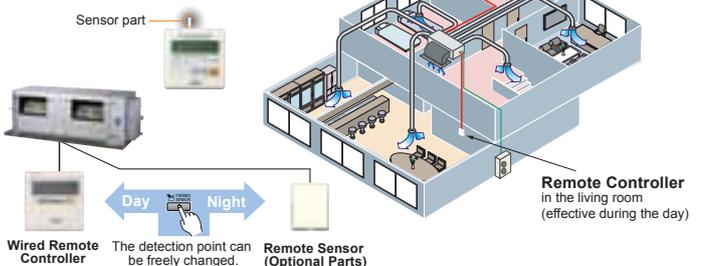

### 3.Remote Sensor (Optional Parts)

## Accurate & Comfortable

- New amenity space can be offered by installing a thermo sensor in the remote controller.
- Because the remote controller has a switching function, the user can select the sensor position. (Room temperature sensor selection)

Example of room temperature sensor selection

# BIG MULTI TYPE SYSTEMS

## Simultaneous Operation

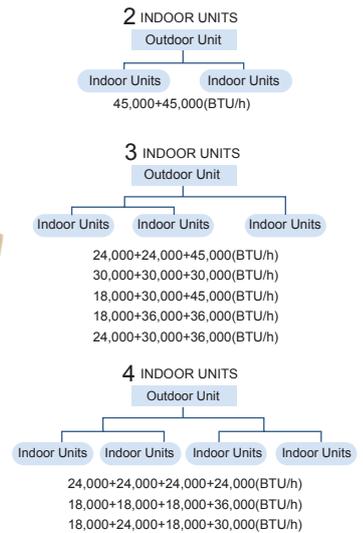

### Features of System Operations

- Simultaneous Operating System suitable for large spaces such as offices, lobbies and waiting rooms of high-rise buildings.
- One controller can simultaneously control cooling or heating by 2~4 indoor units.

- Long piping for high-rise buildings
- Various combinations of indoor unit types and capacities
- Centralized control by wired remote controller with weekly timer
- Cooling and heating at low outdoor temperatures
- Space saving
- Easy installation

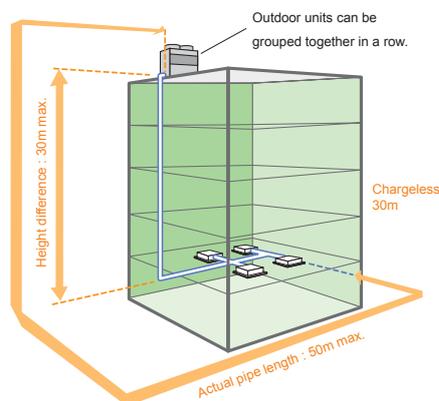

### Indoor Unit Combinations

# Individual Operation

## Features of System Operations

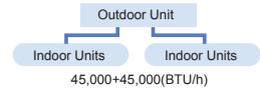

- Individual Operating System is suitable for large spaces such as hotels, commercial spaces, offices and restaurants.
- The system can cool and heat individually, because it has two refrigeration cycles.

- Two refrigeration cycles
- Various combinations of indoor unit types and capacities
- Centralized control by wired remote controller with weekly timer
- Cooling and heating at low outdoor temperatures
- Space saving
- Easy installation

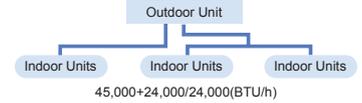

## Indoor Unit Combinations

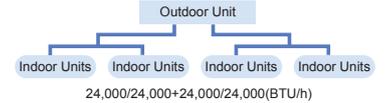

1 INDOOR UNIT + 1 INDOOR UNIT

1 INDOOR UNIT + 2 INDOOR UNITS

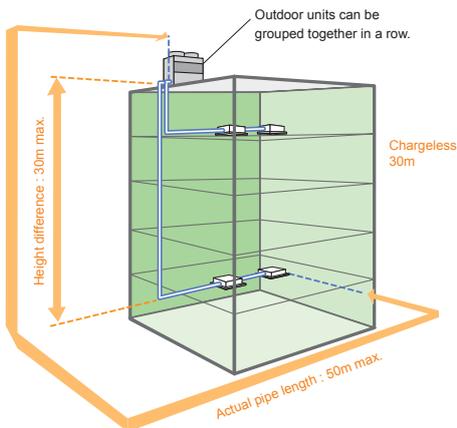

2 INDOOR UNITS + 2 INDOOR UNITS

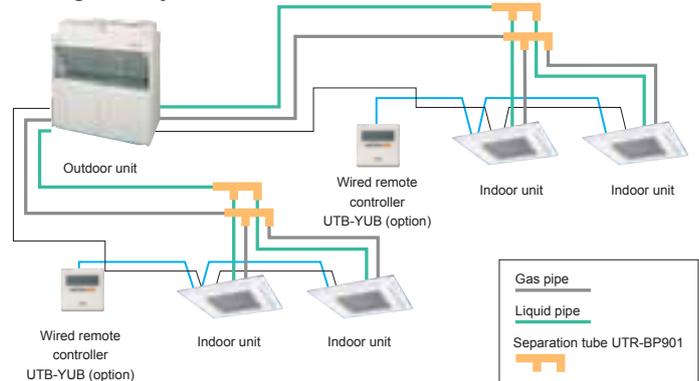

## Indoor Unit Lineup

# WINDOW TYPE

AKY9UB

AMY12UA

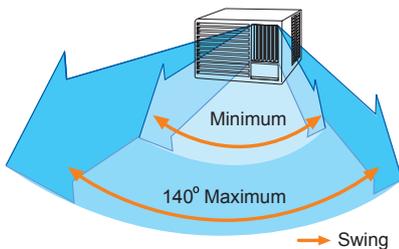

AFY16UA

## The airflow direction can be freely adjusted

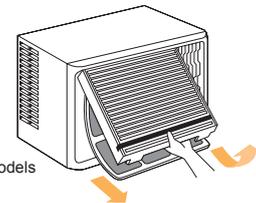

Unrestricted direction of airflow.  
The louver allows airflow coverage as wide as 140°.

Mounting the louver in the center provides coverage of an area as wide as 140°. Cold or warm air is distributed throughout the room.

## Easy filter cleaning

The filter can be cleaned without removing the front panel.

For AFY Models

# Explanation of Features

Comfortable Function		Convenient Function		Clean Function	
<b>Up/Down Swing Flaps</b> The up/down flaps automatically swing up and down.	<b>Connectable Distributing Duct</b>	<b>Sleep Timer</b> The micro-computer gradually changes the room temperature automatically to afford a comfortable night's sleep.	<b>Automatic Filter</b> The filter is automatically cleaned after a set amount of time of air conditioner operation.	<b>UV Filter Cleaner</b> UV (ultraviolet rays) suppresses the growth of mold and germs inside the indoor unit.	<b>Plasma Air Cleaner</b> Electrically charged filter removes contaminants, dusts and odors. It also prevents the growth of bacteria.
<b>Double Swing Automatic</b> Complex swing action of flaps enables automatically to swing both horizontal and vertical directions.	<b>Connectable Fresh Air Duct</b>	<b>ON-OFF Timer</b> ON-OFF timer can be set to operate once.	<b>Program Timer</b> This digital timer allows selection of one of four options: ON, OFF, ON→OFF or OFF→ON.	<b>Long-life Ion Deodorization Filter</b> For details, see page 11.	<b>Apple-catechin Filter</b> For details, see page 11.
<b>Automatic Air Flow Adjustment</b> The micro-computer automatically adjusts the air flow effectively to follow the changes of room temperature.	<b>Fresh Air Intake</b> Fresh air can be taken in by a fan which can be connected using external control unit.	<b>Weekly Timer</b> Differnt on-off times can be set for each day.	<b>Weekly + Setback Timer</b> Weekly + Setback timer can set temperature for two times spans and for each day of the week.	<b>Coil Dry</b> The indoor unit can be dried to prevent the growth of mold and bacteria.	<b>Washable Panel</b>
<b>Auto Restart</b> In the event of a temporary power failure, the air conditioner will automatically restart in the same operating mode as before, once the power supply is restored.	<b>Economy Mode</b> Limits the maximum operation current, and performs operation with the power consumption suppressed.	<b>Filter Sign</b> Indicates the filter cleaning period by lamp.			
<b>Auto-Changeover</b> The unit automatically switches between heating and cooling modes based on your temperature setting and the room temperature.	<b>Energy Saving Mode</b> This mode raises the set temperature slightly in the cooling mode and lowers the set temperature in the heating mode to economically control the operation of the unit.				
<b>V-PAM control models</b>					
<b>i-PAM control models</b>
